

## Module 2: FSx Assignment

## Problem Statement:

You work for XYZ Corporation and the current requirement in the organization is for faster file sharing, which can also help in data replication from on-premises infrastructure.

## Tasks To Be Performed:

1. Create an FSx file system for a Windows file server:
  - a. Make sure you have AWS Managed Active Directory with a valid domain name
  - b. Connect it to your Windows EC2 server
2. Create an FSx file system for Lustre and attach it to an Amazon Linux 2 instance.
